IT Help Desk Ticket HD-2026-0431

Submitted via staff portal | Filed by Samuel Okafor, Grade 6 Teacher (T-4102), on behalf of student | Student ID S-91550 | Device: Chromebook asset CB-7712 | Category: Account Access | s.okafor@example-district.k12.nj.us | Ticket: HD-2026-0431

Issue

Student cannot sign in to her district Google Workspace account after several failed attempts at the start of homeroom.

Her Chromebook (asset CB-7712) shows an MDM lock screen after the weekend.

She was unable to open the shared class folder for the science unit.

The sign-in page reports error code AUTH-3102 on every retry.

Request

Requesting a password reset for this student's account and an unlock of her assigned Chromebook so she can join today's lab write-up.

Per the queue policy, I am filing on her behalf because she is in a grade 4-8 classroom.

If a same-day reset is not possible, please confirm the next slot.

Additional

Classroom: Room 118, Period 2.

The student has no prior help-desk tickets this term.

Her parent has been told that a ticket was filed.

Preferred contact method is my district email address above.

I am available during my planning period (10:05-10:50) for follow-up.

The staff handbook says, 'Staff filing on a student's behalf must include the student ID.'

The student ID is included above.

History

Student account created August 2025; no prior lockouts on record.

Device issued at the start of the current school year.

No open device-repair or replacement tickets on this asset tag.

Submitting staff member has completed the annual AI-use acknowledgment.
